PROFILE

Full-stack developer and business systems professional with hands-on experience delivering production web applications, Dynamics 365 Business Central extensions, Power BI reporting solutions, and AI-assisted integrations. Currently delivering end-to-end software and business systems projects at Auckland BioSciences, including internal applications, MCP-based Business Central integrations, dashboards, and web platforms that improve operational efficiency and reduce recurring software costs.

WORK EXPERIENCE

IT Support Assistant | *Auckland BioSciences*

Mar 2025 - Present

Working across software development, business systems, BI, and IT support at Auckland BioSciences, with a strong focus on building practical internal solutions that improve efficiency and reduce reliance on third-party tools. My work includes full-stack application development, Dynamics 365 Business Central customisation, Power BI reporting, Microsoft 365 support, and developing AI-assisted integrations using MCP and custom AL extensions.

- Designed and developed a full-stack Visitor Management System to replace a third-party platform, reducing recurring software costs by approximately 75% while improving control over data, workflows, and features.
- Developing an AI-assisted Business Central integration using MCP and custom AL extensions, exposing company-specific data through controlled read-only access to support operational queries and efficiency initiatives.
- Migrated company websites from a hosted site builder to full-stack web applications, reducing ongoing costs by approximately 80% while improving performance and SEO.
- Developed custom Business Central extensions in AL to automate repetitive workflows, reduce manual data entry, and improve operational efficiency for the team.
- Designed and maintained Power BI dashboards used by operations and management to monitor key business metrics and prioritise urgent actions.
- Provided Microsoft 365 support across SharePoint, OneDrive, Exchange, Teams, account provisioning, device setup, and troubleshooting.

Shift Salary Manager | *Burger King*

Jan 2021 - Mar 2025

Managed day-to-day restaurant operations while completing my studies, with responsibility for team coordination, inventory planning, staffing, and maintaining a consistent customer experience in a high-volume environment.

- Planned and placed stock orders several times per week based on inventory levels, expected demand, weekends, public holidays, and delivery schedules.
- Conducted monthly inventory stock counts and reviewed variances to support stock accuracy and identify discrepancies.
- Coordinated daily staff responsibilities and operational planning to maintain efficient service and a positive experience for both employees and customers.

Help Desk | *Southern Institute of Technology*

Mar 2022 - Dec 2022

Completed a Help Desk internship at Southern Institute of Technology, providing frontline technical support to students and gaining hands-on experience diagnosing hardware, software, and device issues while communicating solutions clearly to non-technical users.

- Provided frontline technical support to students experiencing hardware, software, and device issues.
- Diagnosed and resolved technical problems while communicating solutions clearly to non-technical users.
- Developed strong troubleshooting, customer-support, and problem-solving skills ensuring my solutions were not just effective but also straightforward, making the issues less stressful for students.
